Master Plan-2002 Renovation/Restoration-2004

This Project involved the complete restoration and renovation of the historic church building. The interior with it's carpenter gothic rood screen was enhanced to be more flexible as well as stronger visually and the lighting system was entirely replaced with a modern system that is electronically controlled for maximum flexibility.

For the Master Plan phase of this Project it was important to study how the facility could grow in stages while maintaining an existing and somewhat inadequate parish building until the third phase of building program. We designed a building that could grow over time until the final stage would be to add a much larger worship space, making the historic church into a chapel for the larger, future congregation.

Franklin & Associates, Inc., Local Architect for renovation.
